

MATTHEW RUNDLE

MANUFACTURING SYSTEMS & APPLIED AI

Austin, TX | matthewtrundle@gmail.com | linkedin.com/in/matthewtrundle | github.com/matthewtrundle

Portfolio: matthew-rundle-resume.vercel.app

Systems builder and data leader with 12+ years across manufacturing software, analytics and team leadership. Built the manufacturing execution system now running Western Magnetics' end-to-end production process, from procurement through quality, with 100% traceability across every aspect of the engineering pipeline. Previously founded Domain Labs to build agentic SaaS products and led data science and commercial analytics at Expedia Group.

CORE EXPERTISE

Manufacturing Systems | Applied AI | Agent Workflows | Equipment Integration | Data and Analytics Leadership | Executive Decision Support

PROFESSIONAL EXPERIENCE

Western Magnetics (Westmag) | South San Francisco, CA / Austin, TX

Manufacturing Systems & Applied AI | Jan 2026 - Present

- Joined as employee #13 at an a16z-backed hard-tech startup shortly after its seed round and helped bring the company out of stealth.
- Built the manufacturing execution system from the ground up; it now runs Western Magnetics' end-to-end manufacturing process, spanning procurement, production, quality and supply, with 100% traceability across every aspect of the engineering pipeline.
- Partnered with cross-functional teams to translate factory needs into connected software; worked with mechatronics engineers to build custom controllers and integrations that pull live signals directly from imported production equipment, often reverse-engineering undocumented vendor protocols.
- Built design and test tooling around motor development, including agentic hill-climb experiment loops run in partnership with frontier model teams.
- Built the company website (with a graphic designer), the NDA platform, and the employee check-in/check-out system.

Domain Labs | Austin, TX

Founder, AI and SaaS Solutions | 2025

- Partnered with small businesses to design and build custom SaaS applications, replacing dependencies on Shopify, Squarespace, and fragmented point solutions.
- Built CoreLinq Communications from the ground up: email, SMS, drip campaigns, cold and warm-lead calling, orchestrated through an agentic process with order tracking and fulfillment, coordinating customer outreach and turning conversations into useful next steps.
- Built CoreLinq Scribe for dental practices: tracks patient interactions and generates SOAP notes with ICD codes, CDT codes and procedural notes; includes inventory management with predictive analytics that cross-references upcoming appointments and auto-orders from suppliers.

DATA AND ANALYTICS LEADERSHIP

Expedia Group (Vrbo) | Austin, TX

Senior Manager, Supply and Commercial Data Science and Analytics | Apr 2021 - Jan 2025

- Led supply and commercial analytics to support market prioritization, property acquisition, and business planning.
- Established an executive analytics function delivering regular insights for commercial strategy and resource allocation decisions.
- Led development of listing quality scoring to support property performance analysis and commercial prioritization.
- Built and managed a team of six data scientists and established shared Python and SQL standards for analytics work.
- Integrated disparate data sources into executive reporting to support consistent business decisions.

Expedia Group (Vrbo) | Austin, TX

Manager, Analytics and Data Science | May 2019 - Apr 2021

- Developed market segmentation across more than 15 variables to identify and prioritize high-value property acquisition targets.
- Built regional reporting and analytics frameworks that improved sales visibility, prioritization, and commercial decision support.

EARLIER EXPERIENCE

HomeAway and Vrbo | Global Reporting and Analytics Manager; Data Analyst II | 2018 - 2019

National Instruments | Senior Consultant, Data Analytics | 2016 - 2018

The Advisory Board Company | Senior Business Analyst | 2013 - 2016

TECHNICAL SKILLS

Manufacturing Systems | MES, traceability, procurement and quality workflows, production data, equipment integration

AI Systems | LLM APIs, retrieval-augmented generation, vector databases, agent workflows, natural-language-to-SQL, prompt design

Engineering | Python, SQL, TypeScript, JavaScript, Next.js, React, PostgreSQL, Supabase, API integration, custom controllers and signal ingestion, Docker, CI/CD

Data and Cloud | Databricks, Tableau, experimentation, segmentation, statistical analysis, AWS, analytics pipelines

Leadership | AI strategy, product delivery, executive communication, team building, stakeholder management, operating model design

EDUCATION

Washington State University | BA, Management Information Systems | 2006
