

Matthew Rundle

Manufacturing Software and Applied AI

Austin, TX | 949-734-0624 | matthewtrundle@gmail.com

linkedin.com/in/matthewtrundle | Portfolio | GitHub

Manufacturing software builder with a background in data and analytics leadership. Built and deployed the MES and ERP running Western Magnetics' production, quality and supply workflows. Work spans operator interfaces, equipment data, material traceability and AI-assisted engineering, from prototype through rollout with production staff.

Areas of focus

MES and ERP | Factory workflows | Equipment integration | Quality and traceability | Operator interfaces

Professional experience

Western Magnetics | Westmag

Jan 2026 - Present

Work focus: Manufacturing systems and applied AI

- Built and deployed the manufacturing execution system (MES) and ERP that run Western Magnetics' production, quality, purchasing, inventory and shipping workflows.
- Worked directly with production staff from initial prototype through integration, hardening and rollout, translating factory processes into software used on the floor.
- Designed work-order, routing and station workflows with role-based operator interfaces and an event stream that records production state changes.
- Built interfaces that carry live machine signals into the MES, working alongside the mechatronics engineers who built the equipment controllers.
- Implemented quality checks, nonconformance records, per-unit testing and material tracking, including incoming inspection, lots, FIFO, BOM consumption and kitting.
- Built the platform with Next.js, PostgreSQL, Prisma and Docker, using API boundaries and an audit trail for state changes.
- Built an agentic failure-analysis workbench that connects test results with conclusions traceable to source evidence and agent activity.

Domain Labs | Austin TX

2025

Founder, AI and SaaS Solutions

- Partnered with small businesses to design and build custom SaaS applications, owning system design, data modeling, API design and delivery.
- Built CoreLinq Communications for multi-tenant email, voice and SMS orchestration, with outcome verification before follow-up actions, bounded recovery and human escalation.
- Built CoreLinq Scribe with AI-drafted clinical documentation, human editing and approval, and connections to inventory and practice operations.

Data and analytics leadership

Expedia Group | Vrbo | Austin TX

Apr 2021 - Jan 2025

Senior Manager, Supply and Commercial Data Science and Analytics

- Built and managed a team of six data scientists and established shared Python and SQL standards for analytics work.
- Integrated disparate data sources into executive reporting to support consistent business decisions.
- Led development of listing quality scoring to support property performance analysis and commercial prioritization.

Expedia Group | Vrbo | Austin TX

May 2019 - Apr 2021

Manager, Analytics and Data Science

- Developed market segmentation across more than 15 variables to identify and prioritize high-value property acquisition targets.
- Built regional reporting and analytics frameworks supporting sales visibility, prioritization and commercial decisions.

Earlier experience

HomeAway and Vrbo

2018 - 2019

Global Reporting and Analytics Manager; Data Analyst II

National Instruments

2016 - 2018

Senior Consultant, Data Analytics

The Advisory Board Company

2013 - 2016

Senior Business Analyst

Skills

Manufacturing MES and ERP, work orders and routings, equipment integration, quality records, material tracking and traceability

Engineering TypeScript, JavaScript, Python, SQL, Next.js, React, PostgreSQL, Prisma, Docker and API integration

Applied AI LLM APIs, agent workflows, evidence-linked agent traces, review and hardening of AI-generated code

Data and collaboration Data modeling, executive reporting, stakeholder collaboration and technical team leadership

Education

Washington State University

2006

BA, Management Information Systems
