

MATTHEW RUNDLE

APPLIED AI AND DATA LEADER

Austin, TX | matthewtrundle@gmail.com | [linkedin.com/in/matthewtrundle](https://www.linkedin.com/in/matthewtrundle) | github.com/matthewtrundle

Applied AI and data leader with 12+ years of experience building analytics capabilities, leading technical teams, and translating complex systems into business results. Most recently built from the ground up an end-to-end manufacturing execution system now running production for Western Magnetics and supporting U.S. drone motor manufacturing. Previously founded Domain Labs to build custom SaaS and AI communication systems for small businesses after senior analytics leadership at Expedia Group. Combines hands-on AI system design with product, data science, and executive leadership experience.

CORE EXPERTISE

Applied AI Systems | AI Product Strategy | Agent Workflows | Data Science and Analytics | Technical Team Leadership
| Executive Decision Support | Manufacturing Software

PROFESSIONAL EXPERIENCE

Western Magnetics (Westmag) | South San Francisco, CA / Austin, TX

AI Systems and AI-Native Manufacturing Software | Jan 2026 - Present

- Built from the ground up and deployed the manufacturing execution system that now runs Western Magnetics' end-to-end production processing for U.S. drone motors.
- Connected ERP, MES, operational data, and AI agent capabilities across procurement, production, quality, traceability, finance, and factory operations.
- Translate manufacturing processes into connected data and software workflows designed to improve operational visibility and execution.

Domain Labs | Austin, TX

Founder, AI and SaaS Solutions | 2025

- Partnered with small businesses to design and build custom SaaS applications, replacing dependencies on Shopify, Squarespace, and fragmented point solutions.
- Built a scribe application with inventory and workflow tracking to capture operational activity and connect it to day-to-day business processes.
- Developed an agent-driven communications platform that automated email, phone, and sales outreach and helped several client companies generate new sales.

Expedia Group (Vrbo) | Austin, TX

Senior Manager, Supply and Commercial Data Science and Analytics | Apr 2021 - Jan 2025

- Led analytics strategy supporting 20% year-over-year supply growth and influencing more than \$100M in incremental booking value through market prioritization.
- Established an executive analytics function that delivered weekly insights used in more than \$500M of capital allocation decisions.
- Led development of a listing quality scoring system across more than 570,000 properties, improving conversion by 12%.
- Built and managed a team of six data scientists and established Python and SQL standards adopted by more than 30 analysts.
- Integrated data from more than 30 sources into a unified executive view, reducing decision turnaround time by approximately 80%.

Expedia Group (Vrbo) | Austin, TX

Manager, Analytics and Data Science | May 2019 - Apr 2021

- Developed market segmentation across more than 15 variables to identify and prioritize high-value property acquisition targets.
- Built regional reporting and analytics frameworks that improved sales visibility, prioritization, and commercial decision support.

EARLIER EXPERIENCE

HomeAway and Vrbo | Global Reporting and Analytics Manager; Data Analyst II | 2018 - 2019

National Instruments | Senior Consultant, Data Analytics | 2016 - 2018

The Advisory Board Company | Senior Business Analyst | 2013 - 2016

SELECTED AI SYSTEMS AND PROJECTS

- Western Magnetics Manufacturing Execution System: Built from the ground up and deployed the production system that runs end-to-end manufacturing processing across procurement, production, quality, traceability, finance, and factory operations.
- CoreLinq Agentic Communications Platform: Built a multi-tenant system that orchestrates AI-assisted email, voice, SMS, lead qualification, appointment scheduling, escalation, and campaign analytics across customer workflows.
- CoreLinq Scribe: Built an AI-powered clinical documentation and practice operations product spanning encounter capture, SOAP notes, claims, pre-authorizations, inventory, and workflow tracking.
- RAG Knowledge Assistant: Built a retrieval application using OpenAI embeddings, Supabase pgvector, Claude, Next.js, and Vercel to synthesize evidence from a 69-document collection.

TECHNICAL SKILLS

AI Systems | LLM APIs, retrieval-augmented generation, vector databases, agent workflows, natural-language-to-SQL, prompt design

Engineering | Python, SQL, TypeScript, JavaScript, Next.js, React, PostgreSQL, Supabase, API integration, Docker, CI/CD

Data and Cloud | Databricks, Tableau, experimentation, segmentation, statistical analysis, AWS, analytics pipelines

Leadership | AI strategy, product delivery, executive communication, team building, stakeholder management, operating model design

EDUCATION

Washington State University | BA, Management Information Systems | 2006
